

MEET KADIYA

Ahmedabad, Gujarat | meetkadiya121@gmail.com | +91 8200518250 | linkedin.com/in/meetkadiya | github.com/MeetKadiya

PROFESSIONAL SUMMARY

Integrated M.Sc. IT student and Full Stack / Python Developer focused on web applications, automation, AI-enabled systems, and cybersecurity projects. Uses AI-assisted development to accelerate prototyping, debugging, and iteration while reviewing, customizing, and refining the generated output. Strong in prompt engineering and turning ideas into practical, working software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3
Frameworks: Django, Flask, React.js, Next.js, Node.js, Vite
Database: MySQL, PostgreSQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, GitHub
Security & AI: Cybersecurity, Reconnaissance, AI-Assisted Development, Prompt Engineering

PROFESSIONAL EXPERIENCE

Android Development Internship | Acmegrade

March 2024 - May 2024

Ahmedabad, India

- Developed a responsive Medical Application using Android Studio (Java & XML).
- Designed Login/Register, Swipe Intro, Home, Favorites, Chat, Notification and Profile screens.
- Implemented user authentication using Firebase.

Certified Software Programmer (Certification) | IANT

Nov 2023 - Nov 2024

Ahmedabad, India

- Learned HTML, CSS, JavaScript, Bootstrap, Python (Django, Flask, NumPy), PHP & Laravel.
- Developed web pages using HTML5, CSS3, JavaScript, PHP and MySQL; designed and managed databases.

PROJECTS

One-Click Shield

Unified web security scanner and auto-remediation suite for SSL/TLS, security headers, cookies and DNS, with multi-browser threat analysis and automated fixes.

[GitHub](#) | [Live Website](#)

StudentHelpdesk

Cloud-based multi-agent AI Student Help Desk using Next.js, FastAPI and PostgreSQL, with LangGraph/LangChain, RAG, Docker-first development and AWS-ready architecture.

[GitHub](#) | [Live Website](#)

Dashify

Full-stack CSV analytics dashboard for upload, type detection, filtering, interactive charts, summary statistics, correlation analysis, data cleaning and export.

[GitHub](#)

Password Strength Analyzer

Local-first password analysis, generation and opt-in breach checking tool using FastAPI and React/TypeScript/Vite; password material is analyzed in memory and breach checks use k-Anonymity.

[GitHub](#)

Bug Bounty Copilot

AI-assisted reconnaissance and security workflow tool for discovering subdomains, endpoints, parameters, technologies and potential secrets, supporting human-led security triage.
